EXPERIENCE

Software Engineer Intern   November 2024 - Present
AI Republic | Remote
- Optimized UI of the software for better user engagement
- Currently working on a feedback system for bug reports and feature requests

Software Engineer   August 2024 - December 2024
Fresumes | Buffalo, NY
- Collaborated with a team of developers and project managers to ensure timely feature releases
- Implemented frontend and backend features to enhance user experience and system functionality
- Set up a development server and managed the migration of the production server
- Engaged in Agile development practices, including weekly sprint planning and progress meetings

Web Developer Intern   March 2022 - December 2022
TygaSmart Inc | New York, NY
- Participated in weekly meetings with stakeholders to gather feedback on wireframe
- Created and launched a new website, tygasmart.com

PROJECTS

Flashcard Saas
- Developed a flashcard application leveraging generative AI to create content from user prompts
- Supports CRUD operations, authentication, and payments using Firebase, ClerkJS, and Stripe

Translation Chrome Extension
- Built a chrome extension that translates text from Chinese to English and vice versa.
- Developed using Svelte, Bootstrap, and Openai.

Among Us Machine Learning Model
- Trained a K-nearest neighbors model to predict if a user were to win based off different conditions
- Preprocessed data using Pandas and Matplotlib
